Care and Normal Maintenance Instructions for your Alside Steel Siding

Instructions

1. In most residential areas, normal rainfall is sufficient to keep the siding surfaces clean. Where an unusual amount of dirt is deposited on the siding surfaces, such as under eaves, porches, or other protected areas, a simple cleaning procedure should be scheduled annually or more often if conditions demand. For surface dirt, the use of ordinary non-abrasive household detergents is recommended. For severe conditions, use:

1/3 cup ordinary non-abrasive household detergent

2/3 cup trisodium phosphate

(Soclax or Spic N Span)

1 gallon of water

Follow the manufacturer's directions

For removal, prepare a solution as follows:

1/3 cup powder detergent

(Tide, for example)

2/3 cup trisodium phosphate

(Soilax or Spic N Span, for example)

1 quart 5% Sodium Hypochlorite

(Clorox, for example)

3 quarts of water

CAUTION: Greater amounts of concentration may cause damage to the finish. Always test any cleaner on an inconspicuous area before application to major areas. Excessive rubbing will create an undesirable glossy finish.

2. CAUTION: STRONGER CONCENTRATIONS OF CLEANERS CAN CAUSE DAMAGE TO THE FINISH. RINSE THE SURFACE WELL, WITH CLEAR WATER IMMEDIATELY AFTER CLEANING. AVOID SKIN CONTACT OR GETTING THE SOLUTION IN THE EYES. ALWAYS WASH THE HOUSE FROM THE BOTTOM TO TOP, AND KEEP RINSING THOROUGHLY WITH FRESH WATER WHILE CLEANING.

3. In some areas, mildew may be a problem. It appears as black spots on the surface dirt and is usually detected in areas not subjected to rainfall.

Heavy soil deposits may not be removable in one application and may require repeated cleaning over some length of time.

CAUTION: DO NOT USE CLEANSERS CONTAINING ABRASIVE PARTICLES, SOLVENT OR AMMONIATED-TYPE CLEANERS OR PAINT REMOVER FOR CLEANING YOUR SIDING. THESE MATERIALS MAY SOFTEN OR ACTUALLY REMOVE YOUR SIDING FINISH.

This cleaning and maintenance information is suggested in an effort to be of assistance; however, manufacturer can assume no responsibility for results obtained which are dependent on the solution chemicals as prepared and method of application.
